9. A disruptor according to any preceding claim wherein the projectile is of one of the following shapes:-

(i) a cone form;

(ii) a flat disc;

(iii) a radially symmetric body provided with a spherical, hyperbolic or other concavity;

(iv) a wedge of V-shaped section.

10. A disruptor according to any preceding claim wherein the projectile is made of one of the following materials:-

(i) magnesium;

(ii) zirconium;

(iii) titanium.

11. A kit of parts for a disruptor according to any preceding claim, the kit of parts including a container for a disruptor, a projectile, an enclosure for holding explosive material and having a wall locatable at any one of a number of positions thereby to define the capacity of said enclosure.

12. A method of filling a disruptor comprising a container having a projectile and an enclosure for holding explosive material, the method comprising:

measuring out a quantity of explosive material, placing the quantity of explosive material in the enclosure, locating a wall of the enclosure so that the enclosure is filled with explosive material.

13. A method according to Claim 12 wherein the method includes providing one or more spacer elements to hold the wall in one position and so define the enclosure.

14. A method of filling a disruptor comprising a container having a projectile and an enclosure for holding explosive material, the method comprising locating a wall of the enclosure at one position and placing explosive material in the enclosure until filled.

15. A method according to Claim 14 wherein the method includes providing one or more spacer elements to hold the wall in one position and so define the enclosure.
